

Building a Custom Streaming Package

Build the setup that meets your specific needs.

Every school has different plans for their HSStream streaming setups, and our pre-designed packages fulfill most of those needs. However, for some schools the best option is a custom designed package that meets your every need. After completing a survey that evaluates your feature-by-feature wants, our team builds a one-of-a-kind package solely for your school.

We'll put the pieces together.

Our large selection of standard and add-on features allows for an infinite possibility of combinations. After we evaluate your desired uses and your vision of a broadcast, our team designs the perfect setup for your school. This process results in a custom setup that is built exactly to your specifications.

After designing your HSStream setup, your school will be able to quickly and easily produce live broadcasts of every event. With HSStream, Dad can stream the basketball game from work, Grandma can hear the band concert from across the country, and the community can watch the school board meeting from home. Once your custom setup is built and delivered, your services fee includes a hands-on training session, tech support, a custom HSStream website, and so much more.

Contact us to order your Standard Package and get started with HSStream.
