

## Mobile Streaming Option

**Produce HD streams without spending a penny on hardware.**

If your school is not ready to invest in a complete streaming package, you can still broadcast on HSStream. Simply find a student or parent to volunteer their iPhone or iPad, download our recommended app, connect to WiFi and start streaming. That's it – you are now broadcasting your school's events live online, no computer or camera needed.

**Get the same HSStream Services as our package customers.**

Your setup may be smaller than our basic and standard packages, but the possibilities are just as large. Smartphones and tablets are powerful tools, and this is a perfect way to put them to use. The mobile streaming application is even capable of an easy-to-update scoreboard graphic, making this a great option for all athletic events.

As a mobile streamer, your school will be able to quickly and easily produce live broadcasts of every event. With HSStream, Dad can stream the basketball game from work, Grandma can hear the band concert from across the country, and the community can watch the school board meeting from home. Your mobile services fee includes a virtual training session, tech support, a custom HSStream website, and so much more.

**Contact us to order your Standard Package and get started with HSStream.**
